What it does

- **Layout:** drag furniture, tanks, batteries and appliances into a real van interior. Snap guides, stacking, wall-taper aware placement, groups, scene states (bed up / bed down), first-person walk mode with live headroom, photo mode.
- **Catalog:** 80 furniture and system components, plus a designer for your own parts and AI-generated custom parts.
- **Live numbers:** payload against the van's real limit, front/rear axle split, centre-of-mass marker, a tilt test to the static tipping angle.
- **Power:** daily Wh against battery and roof solar; roof planner places real-dimension panels and fans.
- **Cost:** itemised budget from placed items, materials at sheet/stud prices, cable and pipe per metre.
- **Build Sheet:** stud-level cut list, 1:20 plan sheets, 1:1 wall scribe template, wiring and water schematics, 12-phase build-order checklist, weighbridge report, one printed Build Pack.
- **Openings:** cut windows, roof fans and holes into any panel; counted in weight and cost.
- **Share:** share links, remix links, replay reels of a layout assembling itself, layout roast card.
- **Templates:** Weekender, Family camper, Mobile office, or empty van.

Price model

- **Free trial:** the full app, every van and feature, for 15 minutes of active editing time. No card. The plan stays saved and viewable after the timer ends.
- **Founding Lifetime licence:** \$39 / €36, one payment, no subscription. 500 numbered seats; the price rises to \$59 after that. Includes every future van and feature.
- **Guarantee:** 14 days, full refund, keep your exports, even if you've logged in. Email support@vanplot.com.
- **Merchant of record:** Polar.
- **Tree pledge:** every licence funds a seedling in the Deliblato Sands, Serbia, via Izobilje's Re:Generation project. Receipts are published on the site.
